- Publications and Patents
- Optimal use of Resources and External Collaboration

Scope of the Program

The higher education system in India is the third largest system in the world. The overall social, economic and industrial growth highly relies on the higher educational system of a nation. Encouragement of collaborative research among the higher education system faculties to solve the time variant needs and challenges of the society leads to innovation. Moreover, the vision of a student to spectate around the world lies in the knowledge imparted through advanced knowledge. Enormous regulatory bodies and research councils work under Ministry of Education (MoE) to streamline the quality of higher education in India. Advanced teaching pedagogy, teaching and outcome based research synergies, research facilities of international standards along with industrial and academic collaborative work shall be the immediate requirements. This workshop majorly emphasizes on the opportunities that are available for collaborative research work and associated major challenges with respect to higher educational institutes of India.
